SYSTEMS & CONTROL LETTERS

Author Index Volume 25 (1995)

(The issue number is given in front of page numbers)

Aeyels, D., Asymptotic stability of nonautonomous systems by Liapunov's direct method (4) 273–280
Aggoun, L., A. Bensoussan, R.J. Elliott and **J.B. Moore**, Finite-dimensional quasi-linear risk-sensitive control (2) 151–157
Anderson, B.D.O., see S.W. Kim (3) 199–204
Araki, M., see T. Hagiwara (4) 281–288

Başar, T., Minimax control of switching systems under sampling (5) 315–325
Balakrishnan, V., Linear matrix inequalities in robustness analysis with multipliers (4) 265–272
Bartosiewicz, Z., Local observability of nonlinear systems (4) 295–298
Battilotti, S. and **L. Lanari**, Global set point control via link position measurement for flexible joint robots (1) 21– 29
Bensoussan, A., see L. Aggoun (2) 151–157
Bernhardsson, B., Robust performance optimization of open loop type problems using models from standard identification (2) 79– 87
Bernstein, D.S., see F. Tyan (2) 125–129
Bernstein, D.S., see W.M. Haddad (3) 175–183
Betser, A., N. Cohen and **E. Zeheb**, On solving the Lyapunov and Stein equations for a companion matrix (3) 211–218
Burkov, I.V., Asymptotic stabilization of the position of a rigid body with fixed point without velocity measurements (3) 205–209
Bushnell, L.G., see G.C. Walsh (3) 227–234
Byrnes, C.I., see W. Lin (1) 31– 40

Caines, P.E. and **Y.J. Wei**, The hierarchical lattices of a finite machine (4) 257–263
Chai, T.-Y., see Z.-h. Li (1) 53– 61
Cohen, N., see A. Betser (3) 211–218

Datta, K.B., see V.V. Patel (3) 235–236
Dayawansa, W.P., B.K. Ghosh, C. Martin and **X. Wang**, A necessary and sufficient condition for the perspective observability problem (3) 159–166
De Moor, B., see B. De Schutter (2) 103–111
De Schutter, B. and **B. De Moor**, Minimal realization in the max algebra is an extended linear complementarity problem (2) 103–111
Dey, S. and **J.B. Moore**, Risk-sensitive filtering and smoothing for hidden Markov models (5) 361–366
Di Bucchianico, A., Representations of stochastic processes (5) 343–349

Elliott, R.J., see L. Aggoun (2) 151–157

Farina, L., Necessary conditions for positive realizability of continuous-time linear systems (2) 121–124
Feintuch, A., Suboptimal solutions to the time-varying model matching problem (4) 299–306
Frank, P.M., see A.E. Gegov (4) 307–313

Gegov, A.E. and **P.M. Frank**, Reduction of multi-dimensional relations in fuzzy control systems (4) 307–313
Genesio, R., A. Tesi and **F. Villoresi**, Models of complex dynamics in nonlinear systems (3) 185–192
Ghosh, B.K., see M. Jankovic (1) 63– 73
Ghosh, B.K., see W.P. Dayawansa (3) 159–166

Haddad, W.M. and **D.S. Bernstein**, The octomorphic criterion for real parameter uncertainty: Real-μ bounds without circles and D, N-scales (3) 175–183
Hagiwara, T., Y. Ito and **M. Araki**, Computation of the frequency response gains and H_∞-norm of a sampled-data system (4) 281–288
Hall, S.R., see F. Tyan (2) 125–129
Hocherman, J., J. Kogan and **E. Zeheb**, On exponential stability of linear systems and Hurwitz stability of characteristic quasipolynomials (1) 1– 7
Huang, S.-N., H.-H. Shao and **Z.-J. Zhang**, Stability analysis of large-scale systems with delays (1) 75– 78

Ionescu, V., On the evaluation of the least achievable tolerance in the disturbance feedforward problem (2) 113–119
Ito, H., H. Ohmori and **A. Sano**, Analysis of robust performance with multiple objectives (2) 141–149
Ito, Y., see T. Hagiwara (4) 281–288

Jankovic, M. and **B.K. Ghosh**, Visually guided ranging from observations of points, lines and curves via an identifier based nonlinear observer (1) 63– 73
Jiang, Z.-P., see P. Morin (5) 375–385

Elsevier Science B.V.

Khargonekar, P.P., see E. Nobuyama (4) 289–293
Kim, S.W., B.D.O. Anderson and **A.G. Madievski**, Multiplicative approximation of transfer functions with frequency weighting (3) 199–204
Kogan, J., see J. Hocherman (1) 1– 7
Kokame, H., see T. Mori (4) 251–255

Lafay, J.F., see O. Sename (5) 387–395
Lanari, L., see S. Battilotti (1) 21– 29
Lenz, K.E., Characterizing optimal solutions to weighted mixed sensitivity problems (5) 367–374
Li, Z.-h., T.-Y. Chai, C. Wen and **C.-B. Soh**, Robust output tracking for nonlinear uncertain systems (1) 53– 61
Lin, W., Feedback stabilization of general nonlinear control systems: A passive system approach (1) 41– 52
Lin, W. and **C.I. Byrnes**, Remarks on linearization of discrete-time autonomous systems and nonlinear observer design (1) 31– 40
Lin, Z., A. Saberi and **A.R. Teel**, Simultaneous L_p-stabilization and internal stabilization of linear systems subject to input saturation – state feedback case (3) 219–226
Linnemann, A., An algorithm to compute state feedback matrices for multi-input deadbeat control (2) 99–102
Liu, W., Feedback stabilization of real analytic systems in the plane (2) 131–139
Loh, A.P. and **C.K. Quek**, On the use of Hadamard weightings in the partial decoupling of H^∞ based designs (3) 193–198
Lu, W.-M., A class of globally stabilizing controllers for nonlinear systems (1) 13– 19

Madievski, A.G., see S.W. Kim (3) 199–204
Martin, C., see W.P. Dayawansa (3) 159–166
Martin, P. and **P. Rouchon**, Any (controllable) driftless system with 3 inputs and 5 states is flat (3) 167–173
Meinsma, G., Elementary proof of the Routh–Hurwitz test (4) 237–242
Meinsma, G., J-spectral factorization and equalizing vectors (4) 243–249
Moore, J.B., see L. Aggoun (2) 151–157
Moore, J.B., see S. Dey (5) 361–366
Mori, T. and **H. Kokame**, Polytopes of Lyapunov functions for polytopes of polynomials (4) 251–255
Morin, P., C. Samson, J.-B. Pomet and **Z.-P. Jiang**, Time-varying feedback stabilization of the attitude of a rigid spacecraft with two controls (5) 375–385

Nieuwenhuis, J.W., Another look at linear-quadratic optimization problems over time (2) 89– 97
Nieuwenhuis, J.W., see A.A. ten Dam (5) 337–341
Nobuyama, E. and **P.P. Khargonekar**, A generalization in mixed $\mathscr{H}_2/\mathscr{H}_\infty$ control with state feedback (4) 289–293

Ohmori, H., see H. Ito (2) 141–149

Patel, V.V. and **K.B. Datta**, A modification of theorem for the least bound of the minimum degree of interpolating unit (3) 235–236
Pomet, J.-B., see P. Morin (5) 375–385

Quek, C.K., see A.P. Loh (3) 193–198

Rabah, R., see O. Sename (5) 387–395
Ravi, M.S. and **J. Rosenthal**, A general realization theory for higher-order linear differential equations (5) 351–360
Rosenthal, J., see M.S. Ravi (5) 351–360
Rouchon, P., see P. Martin (3) 167–173

Saberi, A., see Z. Lin (3) 219–226
Samson, C., see P. Morin (5) 375–385
Sano, A., see H. Ito (2) 141–149
Scherer, C.W., A complete algebraic solvability test for the nonstrict Lyapunov inequality (5) 327–335
Sename, O., R. Rabah and **J.F. Lafay**, Decoupling without prediction of linear systems with delays: A structural approach (5) 387–395
Shao, H.-H., see S.-N. Huang (1) 75– 78
Soh, C.-B., see Z.-h. Li (1) 53– 61

Teel, A.R., see Z. Lin (3) 219–226
ten Dam, A.A. and **J.W. Nieuwenhuis**, A linear programming algorithm for invariant polyhedral sets of discrete-time linear systems (5) 337–341
Tesi, A., see R. Genesio (3) 185–192
Tyan, F., S.R. Hall and **D.S. Bernstein**, A double-commutator guaranteed cost bound for robust stability and performance (2) 125–129

Villoresi, F., see R. Genesio (3) 185–192

Walsh, G.C. and **L.G. Bushnell**, Stabilization of multiple input chained form control systems (3) 227–234
Wang, X., see W.P. Dayawansa (3) 159–166
Wei, Y.J., see P.E. Caines (4) 257–263
